# CRIZAL® NO-GLARE LENSES PROVIDE THE CLEAREST VISION POSSIBLE

## Reduce glare

Glare, poor night vision, and reflection are major concerns for patients

- Less reflection during the day and safer nighttime driving

## Resist scratches

Scratch resistance is the benefit patients want most in anti-reflective lenses

- Protection against everyday wear and tear, with no scratches from cleaning

## Repel water

Patients want lenses that stay clean in outdoor environments

- More convenient to wear outdoors

## Resist smudges

Lenses that smudge easily are a major source of frustration

- Fewer smears and fingerprints mean less visual distraction

## Repel dust

Patients are bothered by dust, dirt, and lashes clinging to static on the inside of lenses

- *Crizal* repels these particles, so lenses stay cleaner longer

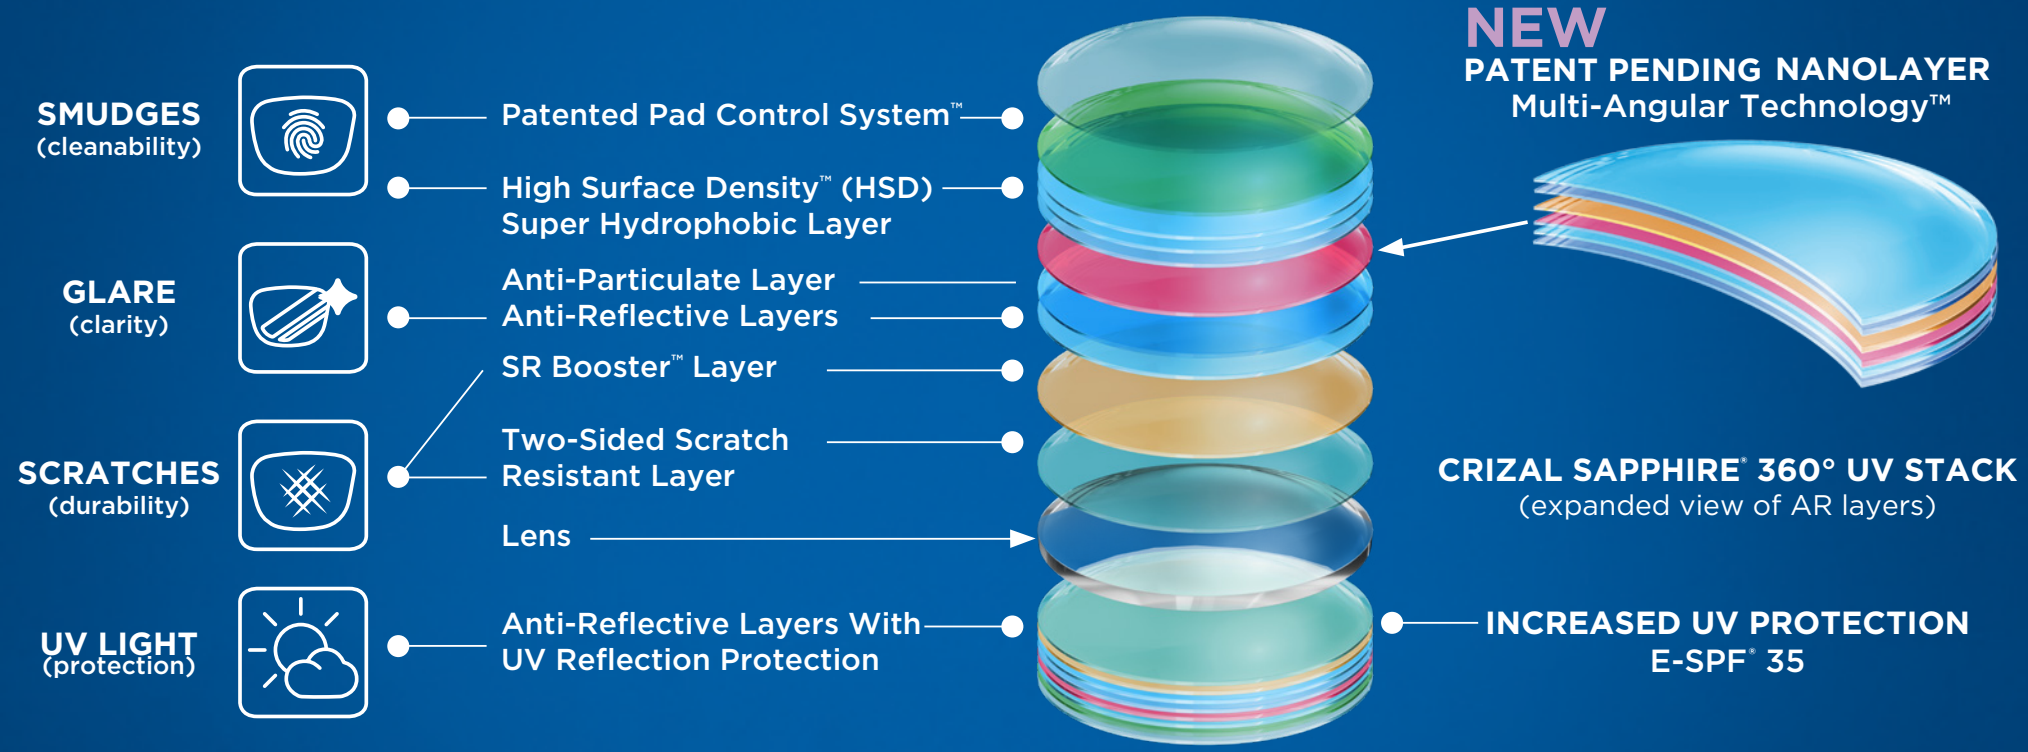

## Comprehensive UV protection

UV protection is needed every day, but many patients don't know this

# CRIZAL SAPPHIRE® 360° UV LENS 9-STEP PROCESS

E-SPF is an index rating the overall UV protection of a lens. E-SPF was developed by Essilor International and endorsed by third party experts. The E-SPF index relates to lens performance only and excludes direct eye exposure that depends on external factors (wearer's morphology, frame shape, position of wear).

# CRIZAL® PRODUCT FAMILY

- More durable than ordinary lenses
- Easier to clean than ordinary lenses

- All the benefits of Crizal Easy UV lenses, PLUS:
- Superior protection against smudges, oil, and water
  - Lenses stay cleaner longer

- All the benefits of Crizal Alizé UV lenses, PLUS:
- 2x more scratch resistance to protect lens investment
  - Repels dust and dirt for clearer vision and less cleaning

- All the benefits of Crizal Avancé UV lenses, PLUS:
- Best-in-class transparency
  - Reduction of reflections from all around the wearer
  - Plus, UV protection has been improved with E-SPF® 35

- Selectively filters at least 20% of Harmful Blue Light\*

Applies to the Crizal lens process

# CRIZAL<sup>®</sup> NO-GLARE LENSES

Worn and trusted by millions of people worldwide.

## Optimal UV protection in a clear lens

The higher the E-SPF<sup>®</sup> Index, the greater the level of UV protection provided by the lens

*E-SPF* is an index rating the overall UV protection of a lens. *E-SPF* was developed by Essilor International and endorsed by third party experts. The *E-SPF* index relates to lens performance only and excludes direct eye exposure that depends on external factors (wearer's morphology, frame shape, position of wear).
